WORK EXPERIENCE

SDE I - Frontend

08/2024 - Present,   *Gurgaon, India*

Achievements/Tasks

- Developed and maintained the front-end of a Data Platform using React.js, optimizing performance
- and UI responsiveness. Implemented reusable components, integrated APIs, and enhanced state management. Collaborated with designers and back-end teams, resolved issues through debugging, and ensured accessibility, scalability, and cross browser compatibility.

PROJECTS

Personal Portfolio: link

A Modern Portfolio with Authentication and Contact Form This portfolio, built with React.js, features a functional Node.js login page and a user friendly form for submissions. It offers a responsive design, smooth navigation, fast load times, and secure form validation for an optimized user experience.

R. News (News API): link

This project allows users to view daily news updates. It is built using HTML, CSS, JavaScript, and integrates a News API to fetch real-time news content. The website is fully responsive, ensuring a seamless experience across all device types.

Page Pilot: link

A high-performance, lightweight React landing page that offers a smooth user experience with a minimalist design. It ensures fast load times and intuitive navigation, making it ideal for businesses, products, or personal branding.
